

MAJOR FUNCTION

This is supervisory work in the more complex construction and maintenance operations of drainage, landscape and tree maintenance, gas, parks, streets, wastewater, water, and other operations. Work requires the supervision of men and major items of construction equipment in construction and maintenance activities. Foreman II does more responsible work utilizing special knowledge, abilities, and skills, with less working supervision than positions assigned to the Foreman I class. An important responsibility is frequently the training and coordination of work force, materials, earth moving equipment and other motorized equipment. All work is assigned by designated supervisor who checks it in process and upon completion and gives detailed supervision to the more technical phases.
